Dear Teacher,

The following is a ONE WEEK lesson plan to enable you to bring Design For Change into your classroom.

The DFC 4 step; FEEL, IMAGINE, DO and SHARE process is broken up here into 7 sessions, of 45 minutes each.
Please do spend more time if you have it available. The plan is for your reference, please feel free to improvise and do what is best for your students.

We would encourage you to help the children articulate their own ideas for a better world and to put them into action. Encourage ALL the children to participate actively and let their voices and ideas be heard. You will truly be surprised at what they come up with because - Superheroes are not in fairy tales - they are in every child who says I CAN!

Skills children will learn: Leadership, Communication, Teamwork, Confidence, Critical and Creative thinking

Sir, why do we have to study all the time and not do anything else?

"Okay! Okay! What do you want to do?"

Play football!

FEEL: Students realized that they could not play properly and there was no order.

Stop, this is not working!

IMAGINE: To play and enjoy the game like a professional team.

I cannot do this alone, Sir. Maybe I can have some students from our class with whom I can practice first and then we can teach the others.

Looking at your progress in sports, some other schools have expressed a desire to have their kids learn football.

Manish, since you are a good player, can you teach us?

To play properly, we have to make teams and divide roles.

Wow Sir! Yes, we would love to coach them as well.

DO: The children formed teams and began training with each other’s help. They developed a very good training program and started winning interschool matches.

This looks so difficult. I don’t think I’ll be able to do this.

It is not difficult, Rhea. Think about it like this, after such a long time we get a chance to do something, we can’t just give up without trying. Come on team, let’s do it.

They continued to coach their football team as well as 7 other school teams. They were able to expand their coaching team and train two coaches in each school to help them. These little kids brought a revolutionary change not only in their school, but also in 7 other schools with their imagination and zest.
After a lot of hard work, the students managed to create a leveled road making the journey safe and hassle free for everyone.

**FEEL:** A very bumpy ride on the way to school. The students of The Orchid Public School had a huge problem with potholes on their way to school. The road was quite dangerous and often caused accidents.

The students wrote many letters to the concerned authorities asking them to take some action. However, they did not receive any response.

**IMAGINE:** They discussed with friends and teachers to figure out the best possible solution to the problem.

**DO:** They split into teams. One group did the digging and the other group started to make the tar. They collected whatever material they could and through trial and error came up with the best possible way of leveling the potholes.

“We are the CHANGE!
We will have to help ourselves and fill the potholes. Let’s meet the contractor to learn how to make this happen.”

After a lot of hard work, the students managed to create a leveled road making the journey safe and hassle free for everyone.

“What impressed us was that these children chose a bold idea for a problem that affected them directly. They decided to take action themselves and designed an effective solution.”

- M P Ranjan, Design Thinker, Jury Member.

“This story won because the children implemented a solution which was beyond rallies and street plays. It clearly has empowered them to take up future challenges. That is the power of I CAN.”

- Christian Long, Cannon Design, Jury Member.
